A person is seen from behind, riding a skateboard on a paved road that curves through a lush green forest. The road is flanked by tall evergreen trees and a rocky embankment on the right. In the distance, misty mountains are visible under a cloudy sky. The overall scene is serene and scenic.

# 01 History

## LAAX Skateboarding

LAAX roots run deep in transition culture. What began in the 1980s with pioneering snowboard halfpipes naturally evolved into skateboarding – first on snow, then into concrete. From early vert ramps set up high in the Alps to the birth of Team Trouble – progression here has always been shaped by creativity and terrain.

Over the past decade, the scene has grown organically: summer tours, high-altitude sessions on old snowboard ramps at 2300 m, and the first skateable mountaintop artwork in 2023. Friends brought friends, and Team Trouble grew into one of Europe's most talked-about transition contests – a place where the culture gathers, the “skaters’ skaters” return, and the Alps echo with pure energy.

By 2025, our focus on skateboarding deepened once more. With *form25*, we're expanding culture in a meaningful way:

- Supporting sustainable skateboarding growth in non-urban regions
- Strengthening Europe's skateboarding network through collaboration and exchange

LAAX today stands at the intersection of snow, surf, and skate – a destination shaped by riders, built for progression, and constantly pushing what mountain skateboarding can be.

# 02 Freestyle Academy LAAX
